

# VyaparMind User Manual ■

Comprehensive Documentation Suite

## The Complete A-to-Z Guide for Operations

---

# 1. Getting Started

## Login & Access

- **URL:** Access the application via your provided company URL (e.g., `localhost:8501`).
- **Language Support:** Use the language selector on the login page for Hindi/Telugu/English.
- **Credentials:** Use the username/password provided by your Super Admin.

## Navigation

- **Sidebar:** All modules are listed in the left sidebar, grouped by vertical (Retail, Restaurant, Cold Storage).
- **Mobile Mode:** Pages like "Inward & Outward" have a toggle for "Mobile Scanner Mode" for easier viewing on phones.

---

# 2. Cold Chain Logistics (The "Chill" Suite) ❄️■

## ■■ ColdZone (IoT Monitoring)

- **Purpose:** View real-time temperature of all storage zones.
- **Features:**
  - **Live Dashboard:** See all sensors at a glance (Green = Safe, Red = Breach).
  - **Alerts:** System automatically sends WhatsApp/Email alerts if temp exceeds limits.
  - **History:** Click "View Logs" to see hourly temperature graphs.

## ■ ColdVault (Inventory)

- **Purpose:** Manage stock location visually.
- **Actions:**
  - **View Stock:** Filter by Client, Commodity, or Expiry Status.
  - **Visual Map:** See a grid view of Racks/Bins.

- **Transfer:** Use logic to move stock between bins (Coming Soon).

## ■ Inward & Outward (Dock Operations)

- **Inward (GRN):**
  - Select Client -> Enter Vehicle No -> Add Items (Commodity, Lot, Qty).
  - **Quality Check:** Upload photos of damaged goods. GRN starts as `PENDING`.
  - **Approval:** Go to **History** tab -> Select Pending GRN -> Click **Approve Quality**.
- **Outward (Delivery):**
  - Select Client -> System shows **FEFO** (First-Expiring-First-Out) list.
  - Select items to dispatch -> Generate Delivery Note.

## ■ ClientLedger (Billing)

- **Purpose:** Generate invoices for storage.
- **Actions:**
  - **Generate Invoice:** Select Client -> Date Range -> Click "Generate".
  - **PDF:** Download professional PDF invoice with compliance certificate.
  - **WhatsApp:** Click "Share" to send invoice directly to client.

## ■ Client Portal (Self-Service)

- **Purpose:** Give this access to your customers.
- **Features:**
  - Clients can see *\*only\** their inventory.
  - **Request Dispatch:** Clients can request stock withdrawal online.

---

# 3. Smart Retail & Grocery (The "Store" Suite) ■

## ■ FreshFlow (Perishables)

- **Use For:** Tracking fruit, veg, dairy expiry.
- **FEFO Logic:** System suggests selling oldest batch first.
- **Actions:** Log "Wastage" to track losses from spoilage.

## ■ POS (Point of Sale)

- **Checkout:** Add items by barcode or search.
- **Customer Linked:** Select loyalty customer to apply discounts.
- **Quick Keys:** Customizable buttons for top-selling items.

## ■ VendorTrust (Supplier Management)

- **Supplier Scorecard:** View auto-generated ratings (1-5 stars) for every supplier based on delivery speed and quality.
- **Onboarding:** Add new vendors with GST/License details.

## ■ VoiceAudit (Inventory Check)

- **How to Use:** Click Microphone -> Say "Count 50 Apples".
- **Result:** AI converts voice to inventory update record.

## ■ IsoBar (Demand Forecasting)

- **Purpose:** Predict future sales.
- **Visuals:** View "Actual vs Predicted" sales graphs to plan purchasing.

---

# 4. Hospitality & Dining (The "Dine" Suite) ■■

## ■ TableLink (Floor Plan)

- **Start Shift:** Define active waiters.
- **Visual Map:** Click a table to:
- **Seat Guests:** Mark as Occupied.
- **Order:** Add menu items.
- **Bill:** Print KOT (Kitchen Order Ticket) and Final Bill.

## ■ Kitchen Display System (KDS)

- **For Chefs:** View incoming orders live.
- **Actions:** Mark "Preparing" -> "Ready". Notifies waiters automatically.

## ■ Online Ordering

- **Public Link:** Share with customers for QR code ordering.
- **Sync:** Orders appear directly in KDS.

---

## 5. Core Administration ■■

### ■■ SuperAdmin

- **Tenant Management:** Create new accounts for different companies (`Onboard New Tenant`).
- **Approvals:** Approve self-registered accounts.
- **Plans:** Manage subscription tiers (Starter/Pro/Enterprise).

### ■■ Settings

- **Store Profile:** Update Logo, Name, Address.
- **Alert Config:** Set Email/Mobile for critical notifications.
- **User Management:** Create staff accounts and assign roles.

### ■■■■■ ShiftSmart (HR)

- **Rostering:** AI suggests optimal staff count based on historic footfall.

### ■■ GeoViz (Analytics)

- **Heatmap:** See where your orders/customers are coming from on a map.

---
